

## NCL-12UL

*The NCL-12UL is a rugged UL listed, NEMA approved enclosure designed to accommodate up to six boards.*

### The NCL - 12UL includes these features:

- Rugged 18-gauge steel with gray powder-coated finish (inside & out)
- UL Listed
- NEMA Type 1 approved
- Built-in cable management
- Configured for up to 6 boards
- Built-in board standoffs
- Electrical knock-outs (1/2", 3/4" and 2")
- Fully adjustable cabinet tamper switch
- Cabinet security lock with two keys
- Metal pocket for quick reference guide
- Mounting hardware pack for access control modules

### The RS2 NCL Line of Enclosures

RS2 Technologies has designed the NCL line of enclosures with flexibility and easy installation in mind. They are rugged, 18-gauge steel NEMA approved enclosures that are designed to accommodate multiple board configurations. The NCL, NCL-12, and NCL-12UL are equipped with male threaded studs designed to accept 1/2" standoffs that facilitate attachment of both large and small boards. Standard RS2 NCL enclosures include the NCL, NCL-12, NCL-12UL and SBE models. Other models are available by special order (contact your Regional Sales Manager).

SECURITY

## Dimensions:

18" (W) x 24" (H) x 4.5" (D)  
(457 mm x 610 mm x 114 mm)  
Note: 5" (127 mm) (W) with door

## Material:

18-gauge powder-coated steel

## Standards:

UL Listed  
NEMA Type 1 approved

## Application Note:

The NCL-12UL is equipped with a wire management system that allows 110 VAC power to be wired directly into the enclosure without stepping down to 24 VAC or lower. It also includes a 110 VAC illuminated reset switch/breaker, 4 thermally protected circuit breaker outputs (with status LEDs), a rechargeable 7.0 Ah 12 V battery (lead acid), a 6 amp super clean linear performance supply charger, and a switched DC power distribution module. The NCL-12UL is fully vented and has a 12-reader capacity. UL installations can be achieved by adhering to the NCL-12UL Hardware Installation Manual with any combination of our EP-1502, EP-2500, MR-52, MR-16IN, MR-16OUT and MUX-8 boards.
