RS2 Technologies

Access It!® - a family of access management
SOFTWARE SOLUTIONS

RS2 Technologies' Access It!® line is the industry's most advanced, easy-to-use access control software. To accommodate a wide range of applications, the software line ranges from Access It!® Lite.NET, an entry-level, single-user system, to Access It!® Universal.NET, a scalable system that can be expanded from single-building control into a multi-user, enterprise-wide system.

Access It!® was designed from the ground up, with the end user in mind. By using the familiar Outlook® style interface for each version, the Access It!® line results in an operational access control system in minutes instead of hours. Frequently performed operations, such as image capture and adding cards, are changed into straightforward, step-by-step operations. With this simple concept, investments in user education are maintained throughout the life of the system, while streamlining system administration tasks.

## Access It!® Universal.NET

An Access Management Solution for Any Size Business!

Whether you need simple access control for a few employees in a single building, or a variety of operations for thousands of employees in a multi-region system, **Access It!® Universal.NET** is designed to meet your needs. This powerful, user-friendly software allows you to select the feature sets you need to build a scalable, cost-effective system. **Access It!® Universal.NET** is available in both Standard and Enterprise versions, both of which support all these outstanding features and many, many more:

Access It!® Universal.NET features a browser (web) thin client, a mobile client, an screens that can be un-docked and viewed on separate screens.

- Browser (web) thin client ("device aware" for mobile devices)*
- Terminal services thin client*
- Multiple monitor support (using un-dockable windows)
- Stand-alone or network capable
- Support for Casi-Rusco/GE Micro5 bridge products
- Support for Honeywell WIN-PAK and ProWatch hardware*
- Integration with wireless/IP and PoE (Power-over-Ethernet) locksets, and other third party devices (DVR, CCTV, intercom, intrusion detection, etc.)
- Support for MR-51E Ethernet-enabled PoE paired reader, single-door SIO module
- Support for OSDP (Open Supervised Device Protocol) readers
- Photo badging including encoding*
- GSA FICAM tested support for pivCLASS & PIV-I cards
- User-definable event and alarm colors
- Alarm/Event processing/filtering
- Support for Virtual Machines – including High Availability VM's
- Single server or distributed regional servers
- Supports Microsoft® Cluster Server for hot server redundancy
- Multiple credentials per person

- Anti-Passback/Occupancy Counting
- Data exchange utility*
- Variable duration holiday and holiday groups
- Automatic enrollment reader support
- Elevator control (up to 64 floors)
- Precision (single door) access control
- Visitor management*
- Escort required card assignment
- Interactive graphical maps and hardware tree
- True database partitioning
- Supports unlimited clients and user-defined macros
- Supports global macros for system-wide lockdown
- Support for multiple card and reader technologies, including biometric
- E-mail and paging notification*
- Custom Report Designer*
- Unlimited user-definable cardholder fields
- Import/Export utility*

▶ Access It!® Lite.NET

Access It!® Lite.NET is a user-friendly, entry-level access control software package, designed with ease of use as a cornerstone. Access It!® Lite.NET is an "out of the box" access control solution that is perfect for entry-level systems. It supports up to 64 readers and access levels. Access It!® Lite.NET can be easily upgraded to Access It!® Universal.NET.

▶ Software Service and Support

RS2 Technologies is dedicated to providing expert technical support and services in a timely and accurate manner. We understand that supporting our customers' needs is as important as the products that we develop.

In addition to 24-hour phone and e-mail consultation, we also use the web-based TeamViewer system to assist customers with rapid diagnosis and resolution of support issues. TeamViewer allows us to instantly share and interact with remote customer desktops – anywhere in the world. The inclusion of one of the industry's most comprehensive "knowledge bases" on our web site is one of the services that helps keep RS2's Technical Support positioned as a market leader.

Full product documentation is available on our web site. This includes all software user manuals and hardware installation guides. General information and technical support bulletins are sent out on a regular basis.
